INTEGRATED STOCK CONTROL USING MOBILE TECHNOLOGY

Stock control comes to your warehouse. Capture product movement including sales and transfers, perform stocktakes, print stock tickets, using the same equipment you use for Fuel Companion and Retail Companion.

Standardise procedures for staff and improve synergy across your business. Sign on screen, produce dockets in your warehouse and upload electronically to Office Companion.

BUILT BY THE INDUSTRY FOR THE INDUSTRY

Designed to take the hard work out of managing your warehouse.
No more docket books, scraps of paper floating around the back of the ute
or reminders written on your hands.

- **Stock receipt:** scan items at point of receipt, match to supplier's delivery dockets and your purchase order. Electronically transmit to your back office system.
- **Sales:** scan or enter items and produce invoice or delivery docket before product leaves your warehouse to ensure no stock leaves your shelves without being recorded.
- Perform price checks.
- Capture every movement of stock into and out of your warehouse.
- **Stocktake:** scan items, count, and once you are satisfied with any variances, update your system to give you accurate stock figures.
- Utilise the hardware across other parts of your business with Retail Companion and Fuel Companion.
- Organise new label prints from the warehouse floor.
- Capture every movement of stock into and out of your warehouse.
- Architecture Warehouse Companion currently runs on Windows Mobile, compatible with multiple devices.
- Communication via 3G, GPRS, Wifi, Cradle.
